# ALLSAFE FLOORING

## TACTILES

We stock a comprehensive range of tactiles at competitive prices. We sell both cork-rubber and polyurethane pads (both in 300 x 300mm and 300 x 600mm) with a peel and stick backing. We also have many types of individual tactile studs (from stainless steel to plastic) and can provide expert advice on how to meet Australian standards.

## STAIR NOSING

Allsafe Flooring have stair nosing for a wide range of applications, including stair trims for factories, schools, offices, nursing homes, colleges, fire-stairs, houses, units, restaurants, clubs, hotels, airport lounges, showrooms, buses, trains & boats. We have the latest designs. Our nosings can be customised by fitting one of our many inserts.

## ANTISLIP TAPES

We have self-adhesive carborundum and vinyl-based grip tapes that are easily applied to vinyl, timber, concrete and painted surfaces. They are available in a variety of colours, are water resistant, and can be applied on stairs, ramps, marine areas, ladders, hospital and industrial floors, indeed anywhere there is a slip problem.

## ANTISLIP TILE TREATMENTS AND CLEANERS

We have a safe solution to slippery tiles. Spray on our simple two step DIY system and see up to 100% improvement in the slip resistance of your tiles. It has been used in many applications, including state and local government departments, disability services, community housing, health & aged care organisations, hospitals, nursing homes, shopping malls, hostels, retirement homes and many other industries.

## FLOORSLIP TESTING

We will come to you, and test the slip rating of your floor. We can even prepare you a report on its condition and how it compares to the relevant Australian Standards. We can also test your own tile samples in-house at our Research Centre if you wish. Cost effective solutions can also be provided.

## ANTISLIP COATINGS FOR FLOORS

We provide a variety of antislip coatings for different floor surfaces in both domestic and commercial areas. e.g. food preparation areas, industrial situations, factories, schools, rumpus rooms, garages and laboratories. Our epoxy systems (with or without flake) have low odour, extremely low volatile organic content and excellent resistance to abrasion and staining. We also have polyurethane coatings that are u-v light resistant, and others for interior cork, timber and masonry surfaces. We even have a special water-based system for easy application to asphalt, concrete & timber.
